## TENT TEMPLATE

1. Print this page onto the non-textured side of a letter-sized piece of cardstock or the back of a sturdy piece of paper.
2. Cut out the piece on the solid lines. Score the dashed lines for folding
3. Punch the eyelet holes at the top of the tent and add eyelets in all four holes. (top of eyelet should be on textured/outside)
4. Fold on the dashed lines and adhere flaps A and B to the areas indicated by the gray shading that matches the shape.
5. Fold one front flap on the dashed line so the holes line up. Secure the flap "open" with an eyelet. Repeat for the other front flap.
6. Glue panels C into a card so they meet at the fold of the card.

This line should be 3 inches (7.6 cm). If not, check printer settings and reprint at 100% (no page scaling)
